### Management Comments

"Our 2019 fiscal year is off to a strong start with overall Q1 revenue growing 26% from the prior year driven by double digit revenue growth in each of our business segments," commented Steve Schwartz, CEO of Brooks Automation. "The newly acquired GENEWIZ business is meeting our growth expectations and our Sample Management business increased organic growth to 8% and delivered a record quarter of new bookings. And in a muted semiconductor market environment, the Semiconductor Solutions Group grew 4% sequentially, and 18% from the same quarter a year earlier. The Brooks portfolio and team have never been stronger."

### GAAP Summary, First Quarter, Fiscal 2019

- EPS from continuing operations was \$0.09 in the quarter compared to a loss of \$0.02 in the fourth fiscal quarter of 2018. Revenue growth combined with 100 basis points of gross margin expansion to lift operating income to \$5.3 million, 47% higher in the first fiscal quarter of 2019 compared to the fourth fiscal quarter of 2018. The improvement was partially driven by the acquisition of GENEWIZ, which was accretive to operating income in the quarter. Net interest expense increased \$2.9 million compared to the fourth fiscal quarter, driven by additional debt taken at the time of the GENEWIZ acquisition. The Company reported a \$5.8 million benefit from taxes in the quarter.
- Revenue was \$179 million in the first quarter, an increase of 12% compared to the fourth fiscal quarter of 2018, and 26% higher compared to the first fiscal quarter of 2018.
- Life Sciences revenue was \$67 million, 31% higher compared to the fourth quarter of 2018 and 41% higher on a year over year basis, inclusive of 8% organic growth. The GENEWIZ acquisition, which closed November 15, 2018, contributed \$16 million of revenue in the quarter.
- Semiconductor Solutions revenue was \$113 million, 4% higher compared to the fourth quarter of 2018 and 18% higher on a year over year basis.
- Cash flow from operations was \$6 million in the quarter. The Company raised an additional \$350 million of debt on November 15, 2018 to support the acquisition of GENEWIZ, which was purchased for a cash purchase price of approximately \$450 million. At December 31, 2018, the ending balance of total debt was \$541 million and the balance of cash, cash equivalents, and marketable securities was \$138 million.

### Non-GAAP Profit Discussion for Continuing Operations

- Non-GAAP gross margins were 41.4%, an improvement of 130 basis points compared to the fourth quarter of 2018 and 190 basis points higher than the first quarter of 2018. Life Sciences gross margins were 40.9%, up 440 basis points compared to the first quarter of 2018, driven by a 130 basis points improvement in Sample Management and the addition of the higher margin GENEWIZ business. The Semiconductor Solutions business also

expanded margins 70 basis points year over year to 41.7%.

- Adjusted EBITDA in the quarter was \$28 million, up from \$22 million in the prior quarter and \$18 million in the first quarter of 2018. The adjusted EBITDA margin improved 150 basis points sequentially to 15.6% and reflects 320 basis points improvement from the first quarter of 2018.
- Operating margin improved 160 basis points sequentially and 240 basis points from first quarter 2018 to 11.0% driven primarily by revenue growth and improved gross margins.
- Net interest expense increased \$2.9 million sequentially in the quarter to \$4.9 million reflecting the additional debt utilized to fund the GENEWIZ acquisition.

## Notes on Non-GAAP Financial Measures:

These financial measures are used in addition to and in conjunction with results presented in accordance with GAAP and should not be relied upon to the exclusion of GAAP financial measures. Management adjusted the GAAP results for the impact of amortization of intangible assets, restructuring charges, purchase price accounting adjustments and charges related to M&A to provide investors better perspective on the results of operations which the Company believes is more comparable to the similar analysis provided by its peers. Management also excludes special charges and gains, such as impairment losses, gains and losses from the sale of assets, as well as other gains and charges that are not representative of the normal operations of the business. In this context, the Company has also removed the effect of reversing the valuation allowance reserve on the U.S. deferred income tax assets. Management strongly encourages investors to review our financial statements and publicly-filed reports in their entirety and not rely on any single measure.
